

## POST PEELINGS AND HOME TREATMENTS

biomedical nanotech cosmetology

# OLTREMATERIA®

Italy

### IDRAHYAL SERUM

Nanotech hyaluronic acid based serum in non-oil formulation for a very deep skin hydration especially indicated after strongly dehydrating peelings and for home care

### PROXIMA CREAM

Moisturizing and protective cream with sunscreen, very effective in the immediate post dehydrating and non-dehydrating peeling and at home treatment

### OLTREMASK

Moisturizing and lenitive post-peeling mask with a very high concentration of nanotech anti-oxidant agents

NEUTRALIZING SOLUTION**

# ADVANCED NANOTECHNOLOGY FOR COSMETIC MEDICINE AND DERMATOLOGY

## MANDELIC ACID 50

Superficial peeling nanotech mandelic acid-based combined in macromolecular gel. Indicated in the treatment and prevention of skin aging and its clinical manifestations in all skin types and in all seasons

## PYRUVIC ACID 50

Nanotech pyruvic acid indicated to treat chro and fotoaging, the hyperkeratotic and inelastic skin. Useful also its use in blackheads and acne-prone skin. Causes a wide desquamation of the skin in the third to fifth day

## DEPIGMENTANT GEL

Peeling based on arbutin, cojico purified acid and phytic acid, depigmenting molecules which exert their action in the post of exfoliative phase. Is indicated in all iper-pigmentary disorders of the skin

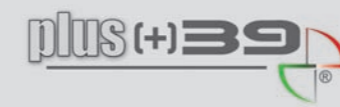

## SALICYLIC COMBINED PEEL

Alcoholic solution of salicylic acid combined with mandelic acid in nanotechnology indicated to treat active acne blackheads and skin prone to acne in any skin type

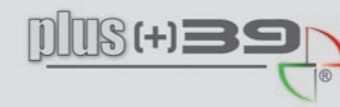

## GLYCOGEL 70-0,5

High concentration and low pH nanotech glycolic acid in macromolecular gel for medium-superficial peeling. The special formulation ensure a gradual and homogeneous action

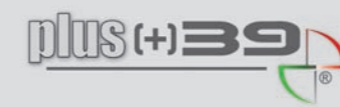

## GLYCOGEL 70-1,5

High concentration and medium pH nanotech glycolic acid in macromolecular gel for superficial peeling. The special formulation ensure a gradual and homogeneous action

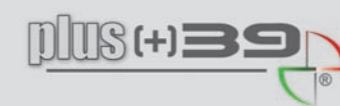

## GLYCOGEL 50-3,5

Low concentration and low pH nanotech glycolic acid in macromolecular gel for superficial peeling. Useful for a first phase of pre-peeling in combination with others especially in association with depigmentant peelings.

## PRE PEELING SOLUTION

Applied before the peeling ensure the right acidity of the skin for a homogeneous action

## NEUTRALIZING SOLUTION

Buffer solution at alkaline pH for an immediate interruption of the peeling action
