Each pack contains
3 syringes of 1ml | 16mg/g of hyaluronic acid sodium salt

NEOVELLE HYDRO

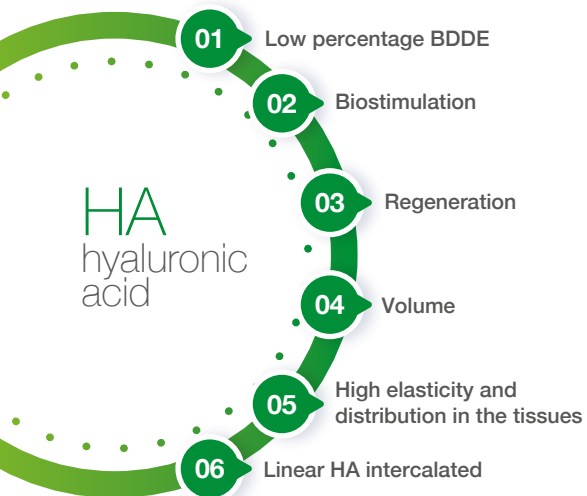

Biorevitalizing Biorestructuring for tissue regeneration and improvement of metabolic processes

Volumetric acid HA 16mg/g ultrapure with 3 distinct fractions:

HA low molecular weight >> regenerating action and collagen production

HA medium molecular weight >> restructuring action with a proliferation of fibroblasts

HA high molecular weight >> moisturizing and anti-radical action

Indications

- in young skin it prevents ageing
- photoaging protection
- rehabilitation in mature skin

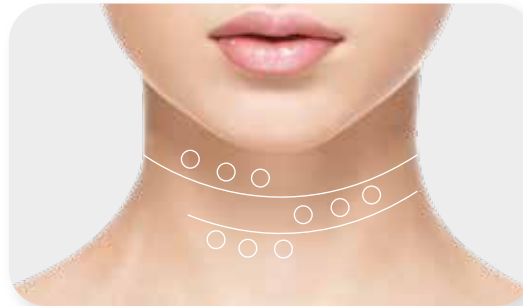

APPLICATION TECHNICIAN

Technique
SURFACE LINER

Technique
MICRO-PUFFS

Technique
LINEAR OR MICRO-PUMPS

Technique
MICRO-PUFFS

Each pack contains
3 syringes of 1.1 ml with 27G / 37 mm microcannula

NEOVELLE HYDRO-VOLUME

The dermo-epidermal stimulation of the **bio-revitalizing**, imitates the volumetric effect of the filler.

Neovelle Hydro-Volume >> allows biostimulation of areas with loss of dermal and hypodermic volume combined with immediate density recovery.

Neovelle Hydro-Volume >> restores a correct balance in the areas of the face subject to ageing, allowing a uniform and long-lasting aesthetic effect.

Facial ageing manifests itself with dehydration, wrinkles, loss of volume in an often asymmetrical way due to a decrease in the thickness of the dermis and subcutis. Volume restoration and biostimulation allow for a harmonious, balanced, bio-restructuring and long-lasting result.

Combination of

- HA crosslinked for volume
- It has free intercalated with bio stimulating effect
